Job Offer

Data Scientist

Summary

We are looking for an experienced Data Scientist to join our data team. As a Data Scientist, you will be responsible for analyzing and interpreting complex data to inform strategic business decisions. You will be required to develop and implement machine learning models, algorithms, and data analysis tools to extract data-driven insights and recommendations.

Responsibilities

- * Analyze and interpret complex data to identify trends, patterns, and improvement opportunities
- * Develop and implement machine learning models, algorithms, and data analysis tools to extract insights and recommendations
- * Collaborate with business teams to understand business needs and objectives and develop data solutions to achieve them
- * Develop and maintain databases and data management systems to store and analyze data
- * Create data reports and visualizations to present findings and recommendations to stakeholders
- * Participate in defining the company's data strategy and implementing data projects to improve processes and outcomes

Requirements

- * Degree in Computer Science, Statistics, Mathematics, or in a related field
- * Experience in data analysis and machine learning model development
- * Knowledge of programming languages such as Python, R or S
- * Knowledge of data analysis tools such as Tableau, Power BI or D3.js
- * Knowledge of databases and data management systems such as MySQL, PostgreSQL or MongoDB
- * Ability to work in a team and communicate complex results to non-technical stakeholders
- * Ability to learn and adapt quickly to new technologies and tools
